If you're looking for a new toy, backup scanner or as some of us call "a beater", you can't go wrong with the PRO-94 especially at the $75 sale price even with it's quirks. However, I wouldn't pay over $100 for this unit due to the fact that much better scanners can be had for about $50 more and I'm sure those will soon have dramatic price cuts as Christmas approaches.

Easier to read and understand manual providing everything you need to program and use your scanner.This manual should make it easier for most people to use some of the more advanced features of the radio as I will try to explain procedures a little more clearly and in a more logical order.

The terrorist attacks of September 11, 2001 marked the first time since Pancho Villa's raid on Columbus, New Mexico that an enemy has attacked an American city. Was this just a fluke or a sign of things to come? Just how safe are the Borders of the United States? For the first time an author with a background in urban wrfare and counter terrorism shows the true state of border security. Are we secure or s target waiting for a marksman? Find out the truth in No Safe Haven: Homeland Insecurity.

In response to popular demand, Emmanuel Goldstein (aka, Eric Corley) presents a spectacular collection of the hacker culture, known as 2600: The Hacker Quarterly, from a firsthand perspective. Offering a behind-the-scenes vantage point, this book provides devoted fans of 2600 a compilation of fascinating—and controversial—articles. Cult author and hacker Emmanuel Goldstein has collected some of the strongest, most interesting, and often provocative articles that chronicle milestone events and technology changes that have occurred over the last 24 years. He divulges author names who were formerly only known as "anonymous" but have agreed to have their identity revealed. The accompanying CD-ROM features the best episodes of Goldstein's "Off the Hook" radio shows. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

A Doody's Core Title 2012 This new illustrated guide to assistive technologies and devices chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. This book empowers people to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

In lively, mordantly witty prose, Negroponte decodes the mysteries--and debunks the hype--surrounding bandwidth, multimedia, virtual reality, and the Internet, and explains why such touted innovations as the fax and the CD-ROM are likely to go the way of the BetaMax. "Succinct and readable. . . . If you suffer from digital anxiety . . . here is a book that lays it all out for you."--Newsday.

In many penetration tests, there is a lot of useful information to be gathered from the radios used by organizations. These radios can include two-way radios used by guards, wireless headsets, cordless phones and wireless cameras. Wireless Reconnaissance in Penetration Testing describes the many ways that a penetration tester can gather and apply the information available from radio traffic. Stopping attacks means thinking like an attacker, and understanding all the ways that attackers gather information, or in industry terms profile, specific targets. With information from what equipment to use and how to find frequency information, to tips for reducing radio information leakage, to actual case studies describing how this information can be used to attack computer systems, this book is the go-to resource for penetration testing and radio profiling. Author Matthew Neely is a respected and well-known expert and speaker on radio reconnaissance and penetration testing Includes real-world case studies of actual penetration tests using radio profiling Covers data leakage, frequency, attacks, and information gathering
