Psychological Criminology addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? This book provides a comprehensive coverage of psychological theories of crime and criminality, exploring theories focusing on factors present at birth (human nature, heredity); theories that focus on factors that influence the offender over the lifespan (learning, development); and theories focusing on factors present at the crime scene. It emphasizes the connections among the different approaches, and demonstrates how, taken together rather than as rival explanations, they provide a more complete picture of crime and criminality than each provides individually. Theories are arranged throughout the book in a temporal sequence, from distal to proximal causes of crime. The analysis spans 100,000 years, from the evolutionary roots of criminal behaviour in the ancestral environments of early humans on the African savana, to the decision to engage in a specific criminal act. Key features of the book include: a focus on theory– ' explaining ' crime and criminality, an integrative approach, accessible to readers who do not have a background in psychology. Psychological Criminology highlights the contributions that psychological theory can make to the broader field of criminology; it will be of interest to students, academics, researchers and practitioners in both criminology and forensic psychology.

Visual techniques for applying criminological theory to social science research Introducing Criminological Thinking: Maps, Theories, and Understanding is an accessible and user-friendly criminological theory text for students, instructors and researchers. In addition to the unique use of concept maps, mind maps, and other visual techniques to consider theory-based inquiry, this text combines an exploration of the core elements of theory with relevant examples drawn from biology, psychology, sociology, critical traditions, and integrative efforts. Unlike in other theory texts, the chapters are arranged by level of explanation to help students understand how theories from different disciplines interact with each other as a foundation for many contemporary criminological theories. Authors Jon Heidt and Johannes Wheeldon have developed a seven-step model to identify key aspects of different theories including their historical and social context, base assumptions, scope, problem foci, terms/concepts, related research, and practical ramifications. This text offers both a student-friendly theoretical discussion and accessible visual examples to explain criminological theory and its applicability to social science research.

Barak provides the first integrated analysis of crime, criminal justice, and criminology through a global lens, revealing the importance of a global perspective for the study of crime and justice in the 21st century. While moving seamlessly from the micro bio-psychological, interactive-social process to the macro cultural-structural forces that shape crime and our responses to it, the author presents the reader with a feast of the latest criminological ideas in this sumptuous tome.

Criminal Justice Today, 12/e, continues to lead as the gold-standard for criminal justice texts. Best-selling, student- and instructor-preferred, and time-tested—Schmalleger is the most current and popular text in the market. The text guides criminal justice students in the struggle to find a satisfying balance between freedom and security, and focuses on the crime picture in America and on the three traditional elements of the criminal justice system: police, courts, and corrections.
