Any Karch has found that students learn best when concepts are built upon each other, growing from simple to complex, building on a foundation of understanding. Organized by body systems, this heavily illustrated book organizes essential nursing pharmacology information into focused, easy-to-learn steps. Building key concepts upon each other, the text gives students a solid foundation of understanding. Easy to understand drug prototype boxes are integrated throughout the book as well as integrated content summaries. It includes the popular and proven "Focus on" theme for drug use across the lifespan, cultural and gender considerations, evidence-based practice, patient teaching, herbal and alternative therapies and dosage calculation, with "Focus on Safe Medication Administration" and a "Drugs in Focus" table for each classification of drugs. Drug discussions include therapeutic actions and indications, pharmacokinetics, contraindications and cautions and adverse effects. Detailed rationales are presented throughout. Each chapter opens with Learning Objectives and a Glossary of Key Terms, and ends with NCLEX-style questions, and contains a case study-based critical thinking exercise with a discussion and case-based nursing care guide. Included in this package is Lippincott's Photo Atlas of Medication Administration (ISBN 9781451112481) which uses the nursing process format to provide step-by-step nursing skills.

A focused, teach-and-test approach to learning pharmacology Focus on Pharmacology: Essentials for Health Professionals helps students learn pharmacology by presenting small amounts of information and then offering opportunities for readers to apply what they've learned through a variety of exercises. Designed specifically for allied health students, early chapters lay the groundwork for learning pharmacology by introducing its history, legal and ethical principles, drug administration techniques, essential math, calculations, and medication errors. Subsequent chapters offer a structured presentation of the drugs intended to treat specific body systems and associated disorders. Each drug chapter starts with a concise review of anatomy and physiology, providing a foundation for understanding drug actions and uses. Pharmacologic principles are then presented in a consistent and easy-to-follow format, using clearly identifiable question-headings that help students focus on need-to-know drug information. Pediatric and geriatric pharmacotherapies are covered in detail, as are substance abuse, antibiotics, and other drug categories. Updated with the latest drug information and featuring seven new chapters, the Third Edition's focused, teach-and-test approach blends concise content with an engaging learning process to help students better retain essential information. For even more practice and review opportunities pair Focus on Pharmacology with the completely revised and expanded Student Workbook. The Workbook (ISBN-10: 0134525299 / ISBN-13: 9780134525297) contains many different types of review questions, including multiple-choice, fill-in-the-blank, true/false, and critical-thinking.
