MENSTRUATION ISN'T JUST ABOUT HAVING BABIES Your menstrual cycle is a vital sign, just like your pulse, temperature, respiration rate, and blood pressure. And it provides you with essential information about your health.The Fifth Vital Sign: Master Your Cycles and Optimize Your Fertility brings together over 1,000 meticulously researched scientific references in a textbook-quality guide to understanding your menstrual cycle. In this book you'll learn: –What a normal cycle looks like; –The best way to chart your cycle and increase your fertility awareness; –How best to manage critical aspects of your health, including better sleep, exercise and a healthier diet; –Natural methods for managing period pain and PMS; –How to successfully avoid pregnancy without the pill; and –How to plan ahead if you do want to get pregnant. The Fifth Vital Sign aims to better connect women with their menstrual cycles, to break the myth that ovulation is only important when you're ready to have a baby. READ THE FIFTH VITAL SIGN TO BETTER UNDERSTAND YOUR HEALTH AND FERTILITY Whether children are a part of your future plans or not, your health matters. Start learning more now, and take control of your health. ABOUT THE AUTHOR Lisa Hendrickson-Jack is a certified Fertility Awareness Educator and Holistic Reproductive Health Practitioner. She teaches women to chart their menstrual cycles for natural birth control, conception, and overall health monitoring. In her work, Lisa draws heavily from the current scientific literature and presents an evidence-based approach to fertility awareness and menstrual cycle optimization.

Sensiplan is a fertility awareness-based method of family planning, known also as natural family planning ("NFP"). Originally developed in Germany over a period of decades by the Arbeitsgruppe NFP ("NFP Working Group") at the international aid agency Malteser International, and with help from the German Ministry of Health. Natural & Safe: The Handbook describes the method and its applications in detail and is an important Sensiplan resource. It is designed to work in conjunction with Natural & Safe: The Workbook, a practice manual that provides practice charts, case examples, and specific instruction for using the method throughout various phases of life. Both volumes are translated now for the first time in English.

This volume explores the latest techniques and improved methods used to study important neurobiological and associated neuropathological conditions. Chapters cover topics such as the application of semiconductor quantum dots as photostable fluorophores used for labeling and tracking; GCaMP6 transcranial imaging to monitor neural activity; the patch-clamping technique allowing simultaneous monitoring of membrane currents and optical signals; and quantifying behavioral dysfunction caused by traumatic brain injury (TBI). In Neuromethods series style, chapters include the kind of detail and key advice from the specialists needed to get successful results in your laboratory. Cutting-edge and practical, Basic Neurobiology Techniques is a valuable resource for novel and expert researchers interested in expanding their knowledge of this developing field.

The classic book on home birth. Stories of the experiences of parents and midwives during the birth process plus a technical manual for midwives, nurses, and doctors. Includes information on prenatal care and nutrition, labor, delivery techniques, care of the new baby, and breast-feeding.

We revisit Lipset's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

Uses the story of five-year-old Graham to present facts about asthma, emphasizing how, with family and physicians working together, childhood asthma can be controlled. Illustrations can be colored.
