day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards.

Build problem-solving skills with this unique series that uses fiction and nonfiction text to present mathematical problems and situations. Students are required to read the passages then use critical thinking to complete each task. Each unit includes a sidebar with tips, tools, and strategies students can use in the problem-solving process. Extension activities are also provided to give them the opportunity to reflect on the passages and discuss their answers. Correlated to

ELA & Math Correlated to the Common Core State Standards.

The contents of this Math workbook include multiple chapters and units covering all the required Common Core Standards for this grade level. Similar to a standardized exam, you can find questions of all types, including multiple choice, fill-in-the-blank, true or false, match the correct answer and free response questions. These carefully written questions aim to help students reason abstractly and quantitatively using various models, strategies, and problem-solving techniques. The detailed answer explanations in the back of the book help the students understand the topics and gain confidence in solving similar problems.

Provides grade-level appropriate problems correlated to state and
