The main criterion of consolidation of this book, "The Cardinal Traits of Insect Morphology and Physiology", is to fulfil the need of the students, who are appearing for JRF, SRF, ARS, NET, Civils and several other competitive exams. To consolidate this book, it takes several days to collect, edit and update the vast literatures from various reference books, journals and different websites. Due to compilation of all the topics into one book, there may be a chance of missing some of the things which will be most useful to the students, so we have tried to consolidate the two basic topics which are utmost important in the entomology, which will give a vast knowledge within a short period of time instead of reading several books and wasting the precious time. It is one of the most useful books to the aspirants, who are appearing for different competitive exams.

From cloud computing to data analytics, society stores vast supplies of information through wireless networks and mobile computing. As organizations are becoming increasingly more wireless, ensuring the security and seamless function of electronic gadgets while creating a strong network is imperative. *Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics* highlights the challenges associated with creating a strong network architecture in a perpetually online society. Readers will learn various methods in building a seamless mobile computing option and the most effective means of analyzing big data. This book is an important resource for information technology professionals, software developers, data analysts, graduate-level students, researchers, computer engineers, and IT specialists seeking modern information on emerging methods in data mining, information technology, and wireless networks.
