a learning system that wants something, that adapts its behavior in order to maximize a special signal from its environment. This was the idea of a "he-donistic" learning system, or, as we would say now, the idea of reinforcement learning. Like others, we had a sense that reinforcement learning had been thor-

Welcome to this project. It is a tiny project where we don't do too much coding (yet) but we cooperate together to finish some tricky exercises from famous RL book Reinforcement Learning, An Introduction by Sutton. You may know that this book, especially the second version which was published last year, has no official solution manual.
