The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages

estimated to cause 93.8 million cases of acute gastroenteritis and 155,000 deaths globally each year, approximately 85% of which are estimated to be foodborne. As a result, Salmonella has a significant public health and economic impact on society. Pork products are among the top foodborne sources of Salmonella globally.

While beef products are a less significant source of salmonellosis in many countries, they have been implicated in several large outbreaks in recent years. Contamination of beef and pork with Salmonella can also have a negative impact on the agri-food and trade sectors due to costly recalls of products and by limiting market access.

The 45th Session of the Codex Committee on Food Hygiene (CCFH) agreed to develop "Guidelines for the Control of Non-typhoidal Salmonella spp. in Beef and Pork Meat." To facilitate this work, CCFH (November 2014) requested FAO and WHO provide scientific advice on this matter, by conducting a systematic

Bridge literature review of the publicly available scientific literature to ensure that any relevant measures for the control of Salmonella in beef and pork are identified, and by convening an expert meeting to review the technical basis of the interventions proposed by CCFH. The experts were specifically asked to: advise
