Are you looking for a Green Job in Solar Sales? Many people want a solar job but don't know about the industry facts or where to get started. This book, which was once a training manual for a solar company, helps the non-technical and untrained, aspiring solar professional to obtain a foundational understanding of the solar industry. It explains the basic concepts, strategies, practices, and equations used today to sell photovoltaic and thermal hot water systems. Do not spend thousands of dollars on "solar schools" without knowing the truth about the solar industry. After reading

A revised 2017 edition of this book has been released. It is called Solar Sales Basics. This original info-packed book is designed to propel an aspiring solar-professional into the burgeoning Green-Energy industry. It trains a novice to be a knowledgeable sales professional (not a technician) and find a Green Job. It was written by a solar professional with the help of licensed contractors and engineers. SSS has been used to teach sales teams across America and is a low cost alternative to high-priced solar training schools. The book teaches about solar efficiency, solar panel types, photovoltaics and solar thermal concepts.

Solar electricity – or photovoltaics (PV) – is the world's fastest growing energy technology. It can be used on a wide variety of scales, from single dwellings to utility-scale solar farms providing power for whole communities. It can be integrated into existing electricity grids with relative simplicity, meaning that in times of low solar energy users can continue to draw power from the grid, while power can be fed or sold back into the grid at a profit when their electricity generation exceeds the amount they are using. The falling price of the equipment combined with various incentive schemes around the world have made PV into a lucrative low carbon investment, and as such demand has never been higher for the technology, and for people with the expertise to design and install systems. This Experthandbook provides a clear introduction
