Master's Thesis from the year 2018 in the subject Pedagogy - School Pedagogics, grade: C, Kwame Nkrumah University of Science and Technology (Institute of Distance Learning), course: Educational Innovations and Leadership Science, language: English, abstract: The success of any organization or institution has never been achieved inadvertently. It is realized by putting in place necessary mechanisms among which supervision plays a fundamental role in all the processes. This study was specifically conducted to assess the supervisory practices opted for by supervisors of SHSs in Adansi Education Directorates in the Ashanti Region of Ghana. The study employed mixed method concurrent triangulation design involving both qualitative and quantitative data collection and analysis. Thus questionnaire and interview were the instruments used while Headmasters, teachers, students and External/Circuit supervisors formed the population. The study attested to the fact that effective instructional supervision, both the external and particularly, the internal types are sine qua-non to the achievement of effective and efficient teaching and learning in secondary schools, which in turn translate into higher students' academic achievement. The findings revealed that during supervision, headmasters in particular and external supervisors assessed teachers' scheme of work, lesson plans, instructional times, punctuality, attendance and methods of teachings in the classrooms. They ensured that teachers had the necessary materials for teaching and organized in-service training for teachers to promote effective teaching in their respective schools. It was found that supervisory practices adopted by headmasters and external supervisors depended on performance of students in their terminal and external final exams. The study also discovered that supervisory practices opted for by headmasters in particular, and external supervisors improved teaching and learning process, students' performance in internal terminal and external final exams. It was also revealed that there were inherent challenges posed by teachers, students and government that confront supervision which needs to be urgently addressed through collaborative effort of all stakeholders for the achievement of quality education. The study has recommended that contemporary supervisory models emphasising motivation and autonomy of teachers should be embraced for optimum teacher-output to optimize students' achievement.

WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is incessantly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army-Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the "Turning the Tide" project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

Document from the year 2017 in the subject Mathematics - Miscellaneous, University of Cape Coast (University of Cape Coast), course: Mphil Mathematics Education, language: English, abstract: This is an instruction guide to the Casio fx-991ES/Plus calculator. It gives an overview of the functions of the calculator and presents some exercises to get acquainted with the functions.

Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough. If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

This engaging open access book discusses how a values and valuing perspective can facilitate a more effective mathematics pedagogical experience, and allows readers to explore multiple applications of the values perspective across different education systems. It also clearly shows that teaching mathematics involves not only reasoning and feelings, but also students' interactions with their cultural setting and each other. The book brings together the work of world leaders and new thinkers in mathematics educational research to improve the learning and teaching of mathematics. Addressing themes such as discovering hidden cultural values, a multicultural society and methodological issues in the investigation of values in mathematics, it stimulates readers to consider these topics in cross-cultural ways, and offers suggestions for research and classroom practice. It is a valuable resource for scholars of mathematics education, from early childhood through to higher education and an inspiring read for all mathematics teachers.

Introduction to African Stories by Moonlight. The most memorable evenings I had as a child were those in which, together with other children, I listened to adults tell us stories which were often accompanied with rhythmic and delightful songs. When I started raising my own family in the city, my children looked forward to those nights when we would regale them with those stories and songs. I noticed then that many urban children were not exposed to these stories, as they were no longer in the environment in which they were told. It was after I did some studies on Indigenous African Education as a Visiting Scholar in the African Studies Center at UCLA, that I realized the molding influence of these stories on our character. Storytelling, of course, was a basic ingredient for traditional African education. I have therefore decided to share some of these stories with those children of African descent who are now away from the environment where they are told. Children and adults of other cultures will enjoy these stories, and learn from the wisdom embedded in them. The enthusiastic reception given to them by the multicultural classes to which I read them in the Long Beach Unified School District in California, further encouraged me to seek to publish them. I have written ten short stories in a language suitable for school readers, and a wider audience. If these stories help to revive storytelling in homes and communities, one objective for writing this book shall have been achieved. For the benefit of teachers who want to use the book to teach English, social studies, or multicultural studies, and for the benefit of families who would like to use the book for entertainment and learning, comprehension questions and answers have been prepared on each of the stories. These are available from paternostercpm@aol.com

This well-established series, the most popular in Nigeria, has been fully revised to reflect recent developments in mathematics education at junior secondary level and the views of the many users of the books. It has especially been revised to fully cover the requirements of the new NERDC Universal Basic Education Curriculum.

Prof. Marian Ewurama Addy is a Professor of Biochemistry. In January 2008 she was appointed President of the Anglican University College of Technology, a newly launched private initiative for higher technical education in Ghana. Professor Addy's interest and extension activities are in bridging the gap between scientific and indigenous knowledge and in the popularisation of science. In her autobiography Ewurama Addy takes us through the various stages of her life, culminating in her rise up the academic ladder and an affirmation of her Christian faith.

Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process 1** methods, copyright, length of print runs, effective procurement practices 1* rather than the production costs should be the target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks
