Software is the essential enabling means for science and the new economy. It helps us to create a more reliable, flexible and robust society. But software often falls short of our expectations. Current methodologies, tools, and techniques remain expensive and are not yet sufficiently reliable, while many promising approaches have proved to be no more than case-by-case oriented methods. This book contains extensively reviewed papers from the thirteenth International Conference on New Trends in software Methodology, Tools and Techniques (SoMeT_14), held in Langkawi, Malaysia, in September 2014. The conference provides an opportunity for scholars from the international research community to discuss and share research experiences of new software methodologies and techniques, and the contributions presented here address issues ranging from research practices and techniques and methodologies to proposing and reporting solutions for global world business. The emphasis has been on human-centric software methodologies, end-user development techniques and emotional reasoning, for an optimally harmonized performance between the design tool and the user. Topics covered include the handling of cognitive issues in software development to adapt it to the user's mental state and intelligent software design in software utilizing new aspects on conceptual ontology and semantics reflected on knowledge base system models. This book provides an opportunity for the software science community to show where we are today and where the future may take us.

'The world is on a trajectory that threatens the security, freedom and human rights of all of us, not just the poor', writes Ian Linden. 'Yet we also have an unprecedented opportunity to dismantle the global apartheid of rich and poor, and remove the root causes of war, terrorism, asylum seekers and economic migration.' We are poised between a dying age of industrial production and the new information and network society, a world as yet uncharted and lacking a shared moral language. A New Map of the World is a not only a brilliant analysis of the state of the world, but of what might justly be said

and done about it by individuals, communities and churches as well as by global institutions. Linden looks honestly at the failures of Christians and Muslims, socialists and radicals, to transform their visions of a just society into reality. He proposes a tentative new blueprint for the future that draws together the case for structural changes with the vital imperative for the formation of individual character.

This book constitutes the refereed proceedings of the 14th International Conference on Information Systems Security, ICISS 2018, held in Bangalore, India, in December 2018. The 23 revised full papers presented in this book together with 1 invited paper and 3 keynote abstracts were carefully reviewed and selected from 51 submissions. The papers are organized in the following topical sections: security for ubiquitous computing; modelling and analysis of attacks; smartphone security; cryptography and theory; enterprise and cloud security; machine learning and security; privacy; and client security and authentication.

Scaling Networks Companion Guide is the official supplemental textbook for the Scaling Networks course in the Cisco® CCNA® Academy® This course describes the architecture, components, and operations of routers and switches in a large and complex network. You will learn how to configure routers and switches for advanced functionality. By the end of this course, you will be able to configure and troubleshoot routers and switches and resolve common issues with OSPF, EIGRP, STP, and VTP in both IPv4 and IPv6 networks. You will also develop the knowledge and skills needed to implement DHCP and DNS operations in a network. The Companion Guide is designed as a portable desk reference to use anytime, anywhere to reinforce the material from the course and organize your time. The book's features help you focus on important concepts to succeed in this course: Chapter objectives--Review core concepts by answering the focus questions listed at the beginning of each chapter. Key terms--Refer to the lists of networking vocabulary introduced and highlighted in context in each chapter. Glossary--Consult the comprehensive Glossary with over 180 terms. Summary of Activities and Labs--Maximize your study time with this complete list of all associated practice exercises at the end of each chapter. Check Your Understanding--Evaluate your readiness with the end-of-chapter questions that match the style of questions you see in the online course quizzes. The answer key explains each answer. Related Title: Scaling Networks Lab Manual ISBN-13: 978-1-58713-325-1 ISBN-10: 1-58713-325-3 Interactive Activities--Reinforce your understanding of topics with all the different exercises from the online course identified throughout the book with this icon. Videos--Watch the videos embedded within the online course. Packet Tracer Activities--Explore and visualize networking concepts using Packet Tracer exercises interspersed throughout the chapters. Hands-on Labs--Work through all the course labs and Class Activities that are included in the course and published in the separate Lab Manual.

The only authorized Lab Manual for the Cisco Networking Academy CCNP Version 7 SWITCH course A CCNP certification equips students with the knowledge and skills needed to plan, implement, secure, maintain, and troubleshoot converged enterprise networks. The CCNP certification requires candidates to pass three 120-minute exams—ROUTE 300-101, SWITCH 300-115, TSHOOT 300-135—that validate the key competencies of network engineers. The Cisco Networking Academy curriculum consists of three experience-oriented courses that employ industry-relevant instructional approaches to prepare students for professional-level jobs: CCNP ROUTE: Implementing IP Routing, CCNP SWITCH: Implementing IP Switching, and CCNP TSHOOT: Maintaining and Troubleshooting IP Networks. This course teaches students how to implement, monitor, and maintain switching in converged enterprise campus networks. Students will learn how to plan, configure, and verify the implementation of complex enterprise switching solutions. The course also covers the secure integration of VLANs, WLANs, voice, and video into campus networks. Comprehensive labs emphasize hands-on learning and practice to reinforce configuration skills. The 15 comprehensive labs in this manual emphasize hands-on learning and practice to reinforce configuration skills.

For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years. But this year, something new is about to happen. The oldest prophecies are about to be fulfilled - and the Festival of Blessings is finally upon us.

The SAFE foundation -- The SAFE implementation roadmap -- The SAFE principles -- The team level -- The program level -- The spanning palette -- The large solution level -- The portfolio level -- Advanced topics -- Glossary.

The advent of terrestrial positioning systems, the internet of things and human sensor networks providing new navigation functionalities sets a novel paradigm for indoor positioning and navigation solutions. The environment, where navigation technology is expected to work, has extended to challenging indoor spaces and to the context of goods and personal mobility. Globally, there is no overall and easy solution. Every year, IPIN gathers over 400 industrial and academic experts in informatics, electronics and surveying to address this challenge. In the footsteps of our French colleagues, the tenth edition of IPIN will be held in Pisa, Italy. It is planned to have technical sessions, tutorials, exhibitions, and indoor geolocation competitions.

A family therapist introduces a practical, effective approach to parenting that explains how to overcome the stresses and anxieties of parenting by learning how to relate to children in a calm, cool, and connected way, emphasizing the need for privacy for every member of the family, how to respect a child's choices and opinions, and how to set new patterns of cooperation and connection.
